

Fw: 2012 Bacti 2012 file (Jan-Mar)

Sara Roser to: Elizabeth Sablad

05/03/2012 08:35 AM

Hi Elizabeth,

CCH shares their bacteria data with us on a quarterly basis in the attached electronic form, in addition to the monthly or quarterly reports they submit for their POTWs. This file contains receiving water data (bacteria counts at shoreline, nearshore, and offshore monitoring sites) from CCH's four ocean outfalls. Seeing the data in this form is very useful to us and to DOH because it allows us to easily assess the bacteria data for the four ocean outfalls. In fact, Jennifer Doi has started including this file in the data she reviews for the 303(d) list. It is much easier for her to use this spreadsheet than to try to pull all of these data from STORET.

A few months ago, CCH wanted to know if we still need this file. At that time, CCH had been sending the file to us every month. We insisted it was necessary and useful. The compromise was a quarterly file, which is fine for us.

When the CCH permits are re-issued, could a statement be included in the permits to require quarterly submittal of an electronic file containing the bacteria data? It would be helpful to receive the nutrient data in the same format, but a different file.

Thanks, Sara
